**Welcome to our newsletter** for September 2006, it has been a fantastic couple of months since our last newsletter and among getting our clients sites online we have been busy upgrading our own website to try and present more information on website design fundamentals, search engine optimisation tips and tricks and ways to help promote your website.

We are utilising the latest in news trends via **RSS** (Really Simple Syndication) to have information easily accessible for our customers and visitors to our site. By adding a dedicated [Website Articles/News](#) page and configured with XML technology, our changes are broadcast to dozens of News Aggregators who quickly add the new 'feeds' to their websites.

We have also introduced a new [Blog](#) site for website industry and SEO information news postings to let you know what's happening in the world of Search Engines (Google, Yahoo etc), News Aggregators and Technology updates. Be sure to [check it out today](#) and take part in our forums where we encourage feedback and comments on all articles and postings.

**Bullie Graphics** is pleased to announce the launch of our new [Blog](#) site to share information relating to website design, search engine optimisation tips and tricks and site promotion as well as social commentary on the latest updates from the major Search Engines.

We will be posting regular updates so please bookmark the site and feel free to comment on any articles and share your suggestions regarding postings. Also available is our Forum where you can start a new topic for discussion or information/link sharing.

Check out our Blog site [here](#)

**Google** has recently announced a free website page creator service where you can easily create a new website on the Google server. Google Page Creator is accessible only after signing up to a new **GMail** (Google Mail) account and a special link code is sent to you via SMS to complete the sign in process.

For more information go to Google Labs at <http://pages.google.com/> or more information at our [Blog](#) site.

**Yahoo Site Explorer (Beta)** was launched in September 2005 and recently in August this year, Yahoo redirected all webmasters queries using Yahoo! Search to get page and inlink data about their site, using 'site:', 'link:', 'linkdomain:' queries to the [Site Explorer](#) results pages, so that you can benefit from this tool's additional features. Site Explorer is used to submit your site information to Yahoo so they can quickly add it to their search results database.

We currently monitor the following sites via Yahoo Site Explorer;

[Aldax Industries](#)  
[Cambridge Lodge](#)  
[The Magic Touch Australasia](#)  
[Wage Audit Reviews](#)

**Latest Article – OK you've got yourself a new website...now what?**

Many businesses spend lots of money setting up a new website what with Domain Name Registration, Website Hosting and most importantly the Website Design; some customers can be out of pocket thousands of dollars...
